

# Electronic Voltage Stabilizer

Scudo AVR voltage stabilizer is signed by ACE Power Electronics it operates silently and is the ideal solution for protection of electronic devices from voltage fluctuations of the grid.

- Compact size with robust design
- Wide range of input (180-264 VAC)
- Voltage stabilization
- Three output sockets for loads connection
- Provides modem/phone line surge protection
- Provides overload, short circuit and over-temperature protection
- Built-in thermal sensor provides over-temperature protection and recover while abnormal situation is eliminated
- Silent operation
- Input filters
- LED indications (operation, stabilization)
